SUMMARY

Detail-oriented and results-driven Python Full Stack Developer with a strong foundation in front-end and back-end development. Proficient in Python, Django, Flask, HTML, CSS, JavaScript, and modern frameworks such as React and Angular. Adept at database management using SQL and MongoDB, API integration, and cloud-based solutions. Passionate about designing and optimizing scalable, user-centric web applications while adhering to best practices in software development. Seeking an internship opportunity to apply technical expertise, collaborate with cross-functional teams, and contribute to innovative projects in a dynamic environment.

PROJECT

E-Commerce Platform with Real-Time Inventory and Admin Dashboard

This project is a full-stack e-commerce web application that enables users to browse, search, and purchase products online while providing administrators with a powerful dashboard to manage inventory, orders, and customer data in real-time. The platform features user authentication, secure payment integration, responsive design, and real-time stock updates using technologies like WebSockets or Firebase.

The admin dashboard offers analytics, product management, and order tracking tools, ensuring seamless control over store operations. Built using a modern tech stack (e.g., React, Node.js, Express, MongoDB), the project demonstrates advanced front-end and back-end integration along with database management and API handling.

Online Food Ordering System

This project is a full-stack web application that allows users to browse restaurants, explore menus, place food orders online, and make secure payments. Users can register and log in, search for restaurants or specific cuisines, add items to their cart, and check out seamlessly. Each restaurant has its own dashboard to manage menus, update item availability, and view incoming orders.

CERTIFICATION

Full Stack Python Developer

Aspiring Python Full Stack Developer with expertise in Python, Django, Flask, React, and SQL. Skilled in building scalable, user-friendly web applications and database management. Seeking an internship to apply technical expertise and collaborate on innovative projects.

Python

This course provided a comprehensive understanding of Python programming, covering fundamental concepts like data types, loops, functions, and object-oriented programming. It also explored advanced topics such as database integration, web development with Django/Flask, and automation. Through hands-on projects and real-world applications, learners gained problem-solving skills and the ability to write efficient, scalable code.
